

ELECTRONIC ACCOUNTS RECEIVABLE CONTRIBUTION

Easy to do:

- NACM Southwest can input your electronic A/R files from any format or data system. We haven't yet found a system we cannot work with, from proprietary one-only systems to SAP. All that we need is a file that contains your information laid out as described by the "Media Definition" sheet. If you have ANY questions about creating this file, please call us.
- If you already submit your data to Experian, D&B or other data providers, you may send that same file to us as well, instead of having a second file created.

Making your credit decisions easier:

- When you contribute electronically and are a member of an industry credit group, you no longer need to input your information manually for the discussion list and account inquiry sheet.
- As we get more companies to contribute electronically, the number of reports needing updates will decrease dramatically; making the reports that you buy that much more effective.

Safety and security:

- The data can be encrypted and/or transmitted securely to us and once we receive it, we keep it on a secure server behind multiple firewalls and encryptions.
- Please have your I.T. department contact KATHY WILSON by calling 972-518-0019 or by email at Kathyw@nacmsw.com for more details; she will be more than happy to assist you.

THANK YOU!
